

MARCH 2017

POWERTRAIN

Committed to being an Industry Leader in Drivetrain Services

By Investing Heavily in State-of-the-Art Driveshaft Remanufacturing Equipment

WHAT MAKES ULT POWERTRAIN A CUT ABOVE THE REST

- State-of-the-art computer balancers deliver highly precision balancing and a quick turnaround.
- Provide a final balancing testing printout, showing the measured runout in 1/1000th of an inch as a superior quantifiable method of balancing a shaft and measuring vibration. This ensures our products meet or exceed OE tolerances.
- Use only OE quality components from industry leading suppliers to ensure premium performance, dependability, great value and less downtime.
- Specialize in automotive, light to heavy duty truck, off-road, performance, PTO and agricultural applications.
- All drive shafts go through a rigorous inspection process by highly trained and experienced technicians.

After

Before

NEW EQUIPMENT INVESTMENT

Test Duration = 5 min. 3 sec.
 Post-Balance Results
 Head: 0.001" @ 287°
 Tail: 0.001" @ 224°
 Phone: (613) 521-3555

High Precision Computer Balancer
Provides printed report with every unit.

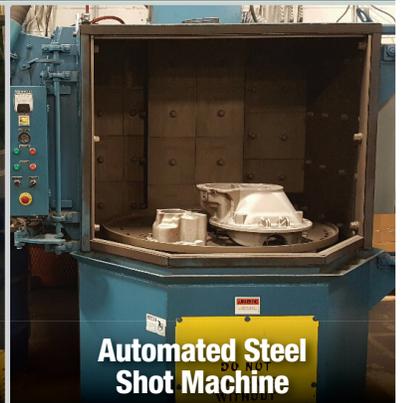

Copy of Detailed Balance Test Provided with each Unit

Automated Push/Pull & Cutting Machine
Speeds up disassembly & reassembly process

Precision Welding & Straightening Table
Straightens to OE specs with perfect welds

Automated Steel Shot Machine
