

## New Core Evaluation Guideline Videos

ULT is pleased to announce our new series of "Core Evaluation Guideline" videos to help our customers better understand how to properly determine what is considered a good reusable core versus a unit that cannot be rebuilt.

We frequently receive questions asking us how to properly determine what constitutes a good rebuildable core versus a non-rebuildable unit. To best answer these questions, we put together a series of core guideline videos that visually explain the step-by-step process involved in determining what cores are or are not eligible for core credit.

**All videos are on our YouTube Channel which is accessible from our website.**
