

New Transmission Actuator & Solenoid Dynamometer

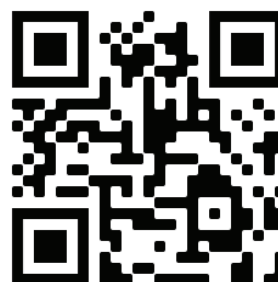

Proper communication with the TECU (transmission electronic control unit) used in Mack and Volvo transmissions is critical to ensure proper OE performance. However, these transmissions can be very difficult to accurately trouble shoot.

At ULT we have addressed this potential problem by developing our own in-house proprietary dynamometer testing system that can accurately test the Actuator and Solenoid Valve independently.

Now every actuator and solenoid unit supplied, (new or reman) is tested on this all-new dyno system. The dynamometer interfaces a TECU (transmission electronic control unit) with the OEM application software to test and ensure the actuator and solenoid valve are performing to original equipment specifications.

See it in Action!

Current OE Actuator Numbers We Can Test Include:

22429963, 6482 000 155, 23417523, 21580956, 21580977, 22809232, 22440568, 21465235, 21320923, 23417527

Current OE Solenoid Valve Numbers We Can Test Include:

22327069, 21935705, 21712495, 21462376, 21301883, 21008347, 20483911
