

See the New State-of-the-Art Transmission Dynamometer in Action!

ULT's newest state-of-the-art Transmission Dynamometer is up and running with great success. This new Dynamometer is specifically designed to accurately simulate the full functionality of Volvo I-Shift and Mack M-Drive transmissions.

The complete (UN-MODIFIED) transmission is installed on the Dynamometer and calibrated in same manner as if installing a transmission in to a power unit.

KEY TEST FUNCTIONS INCLUDE:

- Checking for smoothness of shifting between all gears under FULL, HALF and NO LOAD in all available gear options
- Ensuring communication between the engine ECU and the TCM by J1939 and J1708 connections are functioning properly
